Dear Calvin,

I'm writing this letter on your request after you enquired about the quality and my satisfaction, four years after completion.

I can still honestly use the same words that I used four years ago when I congratulated you on a job very well done. I still remember how we were pressed for time and the inconvenience of moving and expanding the Pharmacy. It was amazing how effective everybody worked en how all the time expectancies were met. Those little problems that always arises while installing was quickly and effectively dealt with. I have revamped my pharmacy three times over the past 20 years and I must say this was the best experience of them all.

Now 4 years down the line I must congratulate you again on the quality of the workmanship since every thing is still functioning perfectly. The products you suggested seems to last forever and the designs you did really makes sense.

I will strongly recommend you to anybody.

Sincerely yours,

Jors van der Schyff
